

# How Email Archiving makes it easy to preserve, protect, and recover your email.

## It's scalable

Even smaller firms can often generate millions of emails. Scalable Email Archiving means paying only for the mailboxes you need as you grow.

- Replicated via eight data center copies vs. four at most for others
- 100% capture across all devices
- Includes Exchange, IMAP and POP
- Unlimited storage capacity and linear scalability
- Full indexing and extraction of 500+ file types (attachments)
- Ultra-fast data ingestion and searching across millions of emails

## It's secure

The keys to compliance and eDiscovery mandates are record authenticity and preservation. Email archiving protects from loss, corruption, damage or misuse.

- FIPS-certified AES 256-bit encryption of stored data
- Data is encrypted both in transit and at rest
- WORM-compliant tamper-proof media
- FISMA-compliant geo-replicated datacenters
- No co-mingling of data—data is stored in individual customer silos to prevent corruption
- 99.99999999% (eleven-nines) data resiliency assures the integrity of your stored emails

## It's searchable

Email Archiving ensures your messages are always available to quickly search, identify, and recover.

- 3 different search methods + advanced full-text indexing
- Identify content with tagging tools & search inside attachments
- Implement legal or compliance holds
- Categorize results before exporting
- Recover messages back to administrator's mailbox in seconds
- Search across millions of emails in every mailbox in your account within seconds

## It's easy to setup and use

For both users and administrators, Intermedia's Email Archiving offers an easy-to-use integrated experience.

- Access admin and searching features via HostPilot
- Grant different levels of accessibility and permissions
- No hardware or software licenses to buy
- Build reports based on archive activity
- Keep records immutably stored regardless of any attempts to alter or delete them
- Extend end-user archive access through Intermedia's online portal or within Microsoft

## Part of Intermedia's Office in the Cloud

Email Archiving is integrated into Intermedia's Office in the Cloud suite of services.

- **Centralized control.** All services are managed using Intermedia's HostPilot Control Panel.
- **IT simplicity.** One vendor, one bill, one source of support.
- **Plan flexibility.** Assign Email Archiving to all mailboxes or just specific ones.
- **Worry-free cloud experience.** Intermedia offers free 24/7 phone
