

# SecuriSync by Intermedia

Cloud file sync and share that gives users simplicity and mobility—and gives your business control and protection.

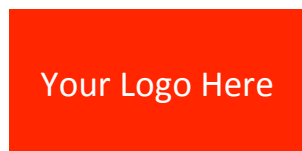

SecuriSync

 <p>Sync content on every device</p>	 <p>Share inside and outside of the company</p>	 <p>Keep content secure and protected</p>	 <p>Create IT efficiencies with central management</p>	 <p>Avoid adding yet another vendor</p>
---	--	--	---	--

SecuriSync is a business-grade file sync and share service. It enables intuitive collaboration and mobility while keeping company data secure and protected. Better still, SecuriSync is integrated with all your Office in the Cloud services—so there's just one vendor, one bill, one control panel, and one source of support.

# SecuriSync balances collaboration and mobility with control and protection.

## Sync files and folders across every device

- Syncing happens automatically the moment a file modification occurs
- Offline work on PCs is synced the moment a user comes back online
- SecuriSync apps available for Mac, Windows, iPhone, iPad, Android, BlackBerry
- Content also accessible through any web browser

## Share with recipients both inside and outside the company

- Intuitive sharing interface is integrated with your corporate address book
- Users can set sharing permissions and change them at any time
- Sub-folders can be shared with different permissions than parent folders
- Recipients can access content even if they don't have SecuriSync installed
- Windows plugins integrate SecuriSync functionality directly into Outlook and Office

## Keep content secure and protected

- Data is encrypted at-rest and in-transit with an account-specific unique security key
- Content protection features guard against accidental deletion or version conflict
- Permissions and access are strictly controlled and easily amended at any time
- SecuriSync data on lost or stolen devices can be wiped remotely
- Reliability is assured with a 99.999% financially backed SLA

## Avoid the complexity of adding another vendor

- SecuriSync is administrated via HostPilot®, the same control panel for all Intermedia cloud services
- Leverage your existing Office in the Cloud and Active Directory settings
- There's just one vendor, one bill, one control panel and one source of support
- No additional integration required
- No need to alter your firewall, VPN, or security policies

## Part of Intermedia's Office in the Cloud

SecuriSync is integrated into the Office in the Cloud suite of services.

- **Simple pricing.** SecuriSync adds a flat per-user monthly fee to your bill.
- **Centralized control.** All Intermedia's services are managed using the HostPilot Control Panel.
- **Flexible plans.** Assign SecuriSync to all users or just specific ones.
- **A worry-free cloud experience.** Intermedia offers free 24/7 phone and email support any time you need it.
